TI Drugs for the treatment of **impotence**

SO Drugs & Aging (1997), 11(2), 140-151

CODEN: DRAGE6; ISSN: 1170-229X

AB . . . interaction between proerectile and antierectile neurotransmitters. It is believed that nitric oxide is the primary erectogenic neurotransmitter and that noradrenaline (**norepinephrine**) is the primary erectolytic neurotransmitter. There are a no. of pharmacol. approaches to the management of **erectile** dysfunction and manipulation of the neurotransmitter systems. These involve direct delivery of drugs into the **erectile** chambers (intracavernosal injection therapy), administration of medications into the urethra (transurethral delivery), application of medications to the skin (transdermal delivery). . . .

ST **impotence** **erectile** dysfunction review

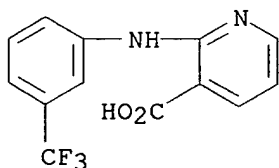

IT Sexual behavior

Sexual behavior
